Management, Web Application
Development

PROFILE

A graduating 4th year IT student with specialization in Web and Mobile Application with proficiency in Data Analysis, Web Development, and Front-end Frameworks. Internship experience includes Data and Report Analysis, Web Development, and UI Design. Eager to contribute to innovative ideas and solutions in software and business development.

EXPERIENCE

Web Developer (Intern) – RELX Reed Elsevier

2025

- Developed a new UI for the Time Off Tracking of the CS Global Time website using the AngularJS.
- Created a report for all the Planned and Completed User Story in Power BI.
- Gained hands-on experience on using Power BI, AngularJS, and .NET Framework.

Graphics Design/Web Dev (Intern) – Highly Succeed Inc.

2025

- Designed intuitive and responsive user interfaces using Figma, focusing on clarity, accessibility, and user engagement.
- Created wireframes, mockups, and interactive prototypes to visualize user flows and validate design concepts.

PROJECTS

CSGlobal Time

- Developed a new and modern UI using AngularJS, focused on user-centric improvements to Time-Off Tracking, resulting in a more efficient and satisfying experience for employees.

Planned vs Done User Story Report

- Developed a dynamic Power BI report leveraging data from Azure DevOps to visualize project metrics, sprint progress, and team performance.
- Applied DAX measures and calculated columns to derive key insights such as velocity trends, work item distribution, and cycle times.

FitQuest

- Led the development for the admin side of a fitness mobile application to manage the user data.
- Implemented Firebase and Node.js to ensure seamless data synchronization and consistent user experience across the platform.
